

International Debt Analysis

Python, SQL, and Streamlit analytics project

Objective

This project converts raw World Bank International Debt Statistics data into a clean analytics dataset, normalized SQL tables, analytical SQL queries, and an interactive dashboard.

Dataset

Source: World Bank International Debt Statistics - <https://databank.worldbank.org/source/international-debt-statistics>

Processed range: 2010 to 2022. The dataset keeps World-counterpart monetary debt indicators measured in current US dollars.
